PROFILE

I design AI systems that solve real business problems. My work combines formal technical foundations - a postgraduate degree in mathematics and computer science, 155+ hours of accredited AI/ML training, and hands-on LLM evaluation experience - with domain thinking and communication skills built over 14 years of professional practice. I am particularly interested in agentic architectures, prompt engineering for production systems, and the business layer of AI implementation.

AI PROJECTS

TaskFlow Agentic Analytics | Personal Project - Python, Gemini 2.5 Pro, SQLite | 2026

- Built a 6-agent LLM pipeline answering a vague boardroom question (why is MRR growth slowing?) for a SaaS business: data quality, analyst, SQL generator, validator, interpreter, advisor
- Designed a deterministic SQL audit layer as ground truth to score the data quality agent: precision 1.00 (zero false positives), recall 0.79 on a clean statistical profile
- Single-author repair loop (validator flags, SQL generator self-corrects); built from scratch with Python, Gemini, SQLite, fully reproducible from a seeded script

3DSmart AI Orchestrator | Personal Project - Python, Gemini 2.5 Pro | 2026

- Designed and built a 5-agent orchestration system for automated tender analysis in the renewable energy sector
- Pipeline: data normalisation (DNPA) → fact extraction (FEA) → compliance audit (CRAA) → technical feasibility (TSFA) → strategic recommendation (SOA)
- Processes procurement PDF/DOCX documents end-to-end; delivers a GO / NO-GO executive report in under 6 minutes
- Built with Google Gemini API, Python, Ip widgets UI, automated PDF export; designed inter-agent JSON contracts and domain-specific knowledge bases

AI EXPERIENCE

AI Model Evaluator | Freelance / Contract | 2025 - present

- Evaluating and improving AI model outputs across multiple project domains; assessing quality, alignment, and instruction-following
- Applying structured evaluation criteria to identify edge cases and provide actionable feedback on model behaviour
- Evaluated LLM outputs and provided structured RLHF feedback across complex reasoning and instruction-following tasks

SKILLS

AI & Agents

Generative AI, multi-agent systems, multi-agent architectures, prompt engineering, LLM orchestration, LLM evaluation & alignment, JSON contracts, AI ethics & risk, agent guardrails, AI implementation planning

Python & Dev

Python (Gemini API, ipywidgets, FPDF, Colab), SQL, GitHub, VS Code, Jupyter Notebook

Markup & Docs

HTML, XML, CSS, Markdown, DITA, Oxygen XML, MadCap Flare, Just The Docs, Confluence, Snagit

Data & BI

Advanced Excel (matrix functions, Power Query, pivot tables), Power BI, SQL, pandas, data visualisation, data analysis

Project Mgmt

Scrum / Agile, Jira, stakeholder management, project coordination, grant management

Languages

Polish (native) · English (advanced)
German (beginner) · Russian (beginner)

EDUCATION

2025 - Jul 2026 **Maths & Computer**

Science Postgraduate | University College of Professional Education

2023 - 2024 **Technical Communication**

Postgraduate | Vistula Academy

2010 - 2015 **PhD - Biblical Studies** |

Cardinal Stefan Wyszyński University Warsaw (research methodology, corpus analysis, structured argumentation)

2007 - 2010 **Master's - Media &**

Journalism | Cardinal Stefan Wyszyński University Warsaw

2005 - 2010 **Master's - Theology** |

Cardinal Stefan Wyszyński University Warsaw

- Assessed model responses for accuracy, coherence, and alignment; contributed to production training pipelines

PROFESSIONAL EXPERIENCE

Teacher | Czeladź Primary School No. 2 | 2019 - present

- Designing and delivering structured learning programmes; differentiating instruction using individual needs and learning data
- Managing stakeholder relationships and coordinating multi-party projects with school leadership and external partners

Foundation President | Adeodat Foundation | 2022 - 2025

- Led strategic direction, external partnerships, and stakeholder management for a non-profit organisation
- Designed and coordinated multi-party projects, ensuring execution across distributed teams
- Developed and managed grant applications; represented the Foundation in institutional relations

Board Assistant | MO40 Sp. z o.o. | 2022 - 2023

- Created structured documentation, reports, and presentations for board-level stakeholders
- Provided graphic and web design support for presentations and online content

University Instructor | Institute of Media and Journalism Education, UKSW Warsaw | 2012 - 2017

- Designed and delivered academic courses; developed syllabi, materials, and assessments
- Conducted and published peer-reviewed research; mentored students on research and career development

Teacher | Warsaw Integration School No. 71, Łazy Primary School No. 1 | 2010 - 2019

- Designed and delivered differentiated instruction using specialised materials and assistive technologies for children with varying abilities
- Collaborated closely with therapists, counsellors, and specialist teams to develop individual support plans for students

AI PORTFOLIO & LINKS

TaskFlow - Agentic Analytics | GitHub / Case study | 2026

- github.com/KinRap/taskflow-analytics-poc - 6-agent pipeline, evaluation harness, recall/precision metrics

3DSmart - Technical Documentation | GitHub / Google Colab / Apr 2026

- 30-page technical spec: agent configs, JSON contracts, pipeline diagram, scoring model
- github.com/KinRap - Python source, ipywidgets UI, automated PDF export

Technical Writing Portfolio | kinrap.github.io/TW_Portfolio/ / 2024 - present

- DITA, MadCap Flare, Simplified English, GenAI for documentation; structured content, docs-as-code
